PRODUCT DESCRIPTION

Glue Fold Self Mailer Machine The Glue Folder folds, glues, and perforates a plain sheet of paper from a variety of sources, including laser printers, to form self mailers. Used as an in plate spot gluing system, the Glue Folder replaces tabbing as a means of sealing standard mail. When the gluing system is not activated, the Glue Folder can perform all functions of a normal two plate folder. The Glue Folder can process up to 17,000 sheets per hour. Among its features is a programmable microprocessor that controls machine operation from a single panel. Other features include electronic double sheet detectors and jam detectors to protect your valuable sheets. The gluing process is under a pressurized system. Accessories include a Pocket Option, a Third Perf Unit, a Z Fold Option and a Compression Unit. In addition to direct mail applications, the Glue Folder system is ideal for processing checks, tax documents, announcements and many other single page business communications. inches Maximum 12 inches Z Fold Maximum flat length 14 1 2 inches International Width Minimum 153mm Maximum 305mm Z Fold Maximum flat length 370mm Glue Folder Options These Options for the Glue Fold Self Mailer Machine are all available on this site. Pressure Roller Flattens multiple sheet mailers and thicker papers to reduce bulk and assure a positive glue seal. Z Fold Sealing Option When a simplex printed mailer requires two panels of concealed information, the Z Fold Option takes care of it. Two panels of information are folded inside the mailer and the address appears on the outside panel. Pocket Option This option forms a pocket that can be used as a return envelope. Envelopes require a strip of remoistenable glue. Sheets of paper containing a glue strip may be purchased from forms manufacturers such as GLUE FOLD. The Pocket Option also lets you design forms with pockets of virtually any size. Pockets may be sealed shut using other finishing equipment or left open to hold inserts. Third Perf Option The addition of the Third Perf Option lets self mailers be perforated on three sides. Removing the three tabs opens the mailer and detaches the third panel. Had the third panel been a check, it would be ready to be endorsed and deposited.
